BFSI experts to deliver knowledge on emerging challenges in the sector

Trescon's 6th Edition of Big BFSI Future Tech Show & Awards will be held at Hyatt Regency, Mumbai, on June 7, 2018. Besides knowledge sharing, the event will honour 100 exceptional BFSI leaders & innovators...

PK CHATTERJEE
Mumbai

Indian Banking, Financial services and Insurance (BFSI) sector has come of age, and today it is a Rs 81 trillion worth entity. Although already set on a speedy growth trajectory, the BFSI sector has been facing multiple challenges – some of which are emerging with the transformation of the society and others are traditional in nature. India's economic reforms and bold new policies are now showing results, which is evident from the World Bank's recent prediction of 7 to 8 per cent growth. However, as in a consumer-led era, with well informed, discerning customers expecting greater value, it is becoming critical for banks and financial service providers to keep up with the imperative forces—such as customer expectations, technological capabilities, regulatory requirements, demographics and economics – and all of them are now coming together to create a precedent for transformation.

At this juncture, businesses are required to identify the need of the hour and leverage emerging technologies to offer a much more holistic view of customers' financial health – while improving their bottom line. With this as backdrop, Trescon is organising this year's Big BFSI Future Tech Show & Awards, which is hosting around 150 CIOs, IT leaders and business owners from the Indian BFSI and NBFC space. They are gathering to network and learn from international tech experts and technology innovators – who will be presenting use-cases, white papers, and showcasing their latest innovations – all under one roof.

Some of the prominent speakers in the sixth edition of Big BFSI Future Tech Show & Awards include Kersi Tavadia, Chief Informa-

tion Officer, BSE Ltd; Anuprita Daga, CISQ, Reliance Capital; Jyothiratha B, CTO, DHFL; Upendra Namburi, Chief Innovation & Marketing Officer; Bharti AXA General Insurance; Sri-ram Naganathan, President – Technology & Digital Innovation, Liberty General Insurance Ltd; Ajay Bohora, Co-Founder & MD, HDFC Credila; Abhijit Shah, CTO, DCB Bank; Yusuf Roopawalia, Head Technology – Program & Change Management, Standard Chartered Bank; Sanjay Mahajan, Chief Information Officer; Satin Creditcare Network Ltd; Sammeer Saurabh, CTO, HDFC Securities Ltd; and Dominic Vijay Kumar, AVP & Head IT, ART Affordable Housing Finance.

The event will also feature some of the biggest names from multiple verticals within the financial services industry, as well as private wealth management and equity firms. Technology solution providers partnered with Trescon for the show are Intel, Fujitsu, Redington, Darktrace, Thales eSecurity, Enquero, Kuliza, Qualitia, Zensoft, and KG-ISL. 'Just Dispose' and Positika as exhibitors. Finesse as Associate Partner and 'BFSI Sector Skill Council of India' as supporting association.

Big BFSI Future Tech Show is a first of its kind of event in India to honour top professionals from the Indian BFSI, NBFC and MFI sectors; who have brought about a sea change in the way technology is leveraged in their businesses. In the show, 50 BFSI leaders and 50 BFSI innovators will receive awards for their outstanding achievements.

Dr SK Mishra, Advisor Bombay Merchantile Bank, former deputy General Manager, Central Bank of India and Usha Menon, GM IT (Retired) Central Bank of India are among the nominated jury members in the award ceremony.
